

Neurosoft A.E.

Front-End Developer

Neurosoft S.A., is a leading software, networking and information security provider in financial, telecommunication, transportation, utilities and government sectors, providing solutions and services aiming to increase operating efficiency and security. Listed in the Italian Stock Exchange since 2009, currently employees 200+ highly skilled professionals with in depth expertise in their field.

We have an open vacancy for a Front-End Developer who will join our Banking Solutions team and participate in the analysis, design, implementation and testing of high quality software solutions.

Roles' Responsibilities

- Builds and maintains cloud-based enterprise applications
- Develops new UIs for API features being developed
- Improves and re-factors existing user-facing features
- Builds reusable code and libraries for future use
- Ensures the technical feasibility of UI/UX designs
- Optimizes application for maximum speed and scalability
- Provides 2nd and 3rd level maintenance and support
- Develops technical documentation
- Collaborates with other team members and stakeholders

Professional Experience & Qualifications

- Bachelor's/Master's degree in Information Technology, Computer Science or any other relevant field
- 2 to 5 years of professional experience in application development of enterprise IT software systems and applications; experience gained in Financial Services or Banking Sectors is highly desirable
- Working experience in client-side scripting and JavaScript frameworks, including Angular, jQuery and other related front-end technologies such as HTML5 and CSS3
- Working experience in Web technologies and internet protocols (ReST, XML, JSON, HTTP)
- Good understanding of Java and Java Spring Framework in a commercial environment
- Knowledge of automated build tools such as Maven and Ant
- Familiarity with agile methodologies and frameworks
- Working knowledge of Relational Databases and ORM technologies (iBatis, Hibernate etc.)
- Experience in deploying, configuring and maintaining Java Servlet containers (Tomcat) and in writing unit tests (JUnit, Selenium) is desirable
- Strong analytical and problem solving skills
- Good organizational skills, ability to deliver within strict timeframes

- Highly motivated and eager to develop professionally
- Ability to work efficiently both on own initiative and within a team
- Excellent use of Greek and English languages (oral and written)
- Military obligations fulfilled (for male candidates)

We Offer

A competitive compensation package, a stable and enjoyable working environment, excellent opportunities for professional development and advancement, working on leading-edge technology and industry trends and ... a lot of coding!
