

NEUROSOFT S.A.

LAMP Systems Administrator

(REF_LAMP)

Neurosoft S.A., is a leading software, networking and information security provider in financial, telecommunication, transportation, gaming and government sectors, providing solutions and services aiming to increase operating efficiency and security. Listed in the Italian Stock Exchange since 2009, currently employees 200+ highly skilled professionals with in depth expertise in their field.

We have an open vacancy for a LAMP Systems Administrator to support the IT operation processes of our clients and integrate innovative InfoSec technologies.

Main Responsibilities

- Configures, manages and optimizes servers and applications that host a number of websites and play an important role in the business viability of the organization
- Being exposed to popular applications and technologies which power websites including Laravel, WordPress, Drupal, Joomla, PHP frameworks, MySQL, MongoDB, Varnish, CDN, and others
- Sets up complex server clusters with full HA capabilities, load balancing, auto-scaling, and disaster recovery.
- Troubleshoots complex problems involving multiple layers of infrastructure and software components. Supports end-users on their day-to-day work
- Works directly with underlying infrastructures such as VMware, OpenStack, SANs, and many others
- Helps customers to run successfully online business by advising them on the right technologies and solutions

Professional Experience & Qualifications

- BSc degree in Computer Science or Information Technology
- Solid experience with LAMP (Linux, Apache, MySQL, PHP/Perl/Python) model of web service stacks
- Knowledge of deployment and administration of Linux environments; experience with any versions of Linux is fine (Red Hat Enterprise Linux, CentOS, Debian, Ubuntu, etc.)
- Experience in deployment and administration of VMWare virtualization environments as well as other virtualization technologies
- MySQL, PostgreSQL or other database administration skills
- Experience with Elasticsearch, Redis, and/or Git is highly preferred
- Experience with Galera cluster for MySQL is desirable
- Knowledge of systems security and system monitoring, analytics tools and alerts
- Understanding of TCP/IP networking, including VPNs, VLANs, routing, firewalling, etc.
- Good analytical and problem-solving skills, with attention to detail
- Strong customer service orientation combined with good communication skills

- Ability to work efficiently both within a team and independently
- Fluency in Greek and English languages, oral and written
- Fulfilled military obligations (for male candidates)

We Offer

A competitive compensation package, a stable and enjoyable working environment, excellent opportunities for professional development, working on leading-edge technology and industry trends.
