

NEUROSOFT S.A.

Senior Network Engineer

(ICT_SNE)

Neurosoft S.A., is a leading software, networking and information security provider in financial, telecommunication, transportation, utilities and government sectors, providing solutions and services aiming to increase operating efficiency and security. Listed in the Italian Stock Exchange since 2009, currently employees 200+ highly skilled professionals with in depth expertise in their field.

We have an open vacancy for a Senior Network Engineer who will design, implement, administer and support large-scale telecom infrastructures at SPs, Data Centers and large enterprise Customers. The candidate should be well experienced across multi-vendor technologies and environments, including Core routers, Switches, BRAS, Firewalls, and security architectures. The dynamic nature of the business means that the candidate will be involved in support of existing and new project opportunities and associated technologies.

Main Responsibilities

- Implementation of technical solutions for customer projects involving integrated components based on corporate policy and best practices. Main equipment vendors are Juniper, Nokia and Cisco
- Active participation in the resolution of telecom support issues on Customer infrastructure
- Root-cause analysis on technical issues on the Network Infrastructure in co-ordination with vendor's TACs
- Provision of Lab and virtual simulation platforms where all telecom nodes are simulated with the exact topology and configuration as in the field

Professional Experience & Qualifications

- BSc in Information Technology, Telecommunications or any other relevant field; a MSc degree is desirable
- At least 7 years of relevant experience in Telecommunications projects
- Strong Knowledge of network infrastructure, including Routers, Switches, NG Firewalls and associated network protocols and concepts (ISIS, OSPFv2, OSPFv3, BGP, L2VPN, L3VPN, MPLS, EVPN, VXLAN, VLANs, STP, wireless etc.)
- Professional certifications by equipment manufacturers such as Juniper Networks, Cisco Systems, and/or Nokia are highly desirable
- Experience with Junos Spare platform is desirable
- Network Automation skills and programming is desirable
- Ability to write technical information in simple form and to communicate effectively
- Strong analytical and problem-solving skills
- Self-motivation and goal orientation
- Ability to recognize and prioritize critical tasks
- Accuracy and attention to detail
- Ability to work efficiently both within a team and independently
- Fluency in Greek and English languages, oral and written

We Offer

A competitive compensation package, a stable and enjoyable working environment, excellent opportunities for professional development, working on leading-edge technology and industry trends.
