

NEUROSOFT S.A.

Security Analyst, L1

(REF_SAL1)

Neurosoft S.A., is a leading software, networking and information security provider in financial, telecommunication, transportation, gaming and government sectors, providing solutions and services aiming to increase operating efficiency and security. Listed in the Italian Stock Exchange since 2009, currently employees 200+ highly skilled professionals with in depth expertise in their field.

We have an open vacancy for a Cyber Security Analyst position (Level 1) who will join our Information Security Services team to further support the monitoring services provided to our customers and eventually mitigate security issues on behalf of them. He/she might need to work along with a team of skilled professionals to address complex problems, when needed. The role assumes monitoring and detection duties on a 24x7x365 Security Operations Center (SOC).

Main Responsibilities

- Monitors client infrastructures for security events and alerts, in case of active or potential threats, intrusions or compromises
- Detects and analyzes network anomalies considered to be Events of Interest (EOI)
- Ensures compliance with organizational security rules and standards
- Delivers appropriate reports by collecting, analyzing, and summarizing data
- Coordinates with Senior Analysts and/or Duty Manager for high priority incidents
- Conducts research to keep abreast of latest security issues

Professional Experience & Qualifications

- Bachelor's/Master's degree in Information Security, ICT, Networking or any other relevant field
- Prior experience as a security analyst is preferred but not mandatory
- Very good knowledge of Linux / Unix / Windows systems
- Solid background in at least one of the following:
 - Networking and associated protocols (TCP/IP, UDP, OSI model etc.)
 - Information Security (Security standards and practices, Security technologies, Security Monitoring, Penetration Testing, Incident Response, Threat landscape etc.)
- Hands-on experience with SIEM - IBM QRadar is highly desirable
- Relevant certifications consist of a strong asset (e.g. CySA, Security +, CEH, GPEN, GSEC)
- Understanding or knowledge of software programming with scripting languages is beneficial

- The role mandates to work ethically, with high degree of integrity, confidentiality and appropriate use of information
- Strong analytical and problem-solving skills, with attention to detail
- Very good organizational and time management skills
- Good communication skills and a customer-oriented approach
- Ability to work efficiently both within a team and independently
- Fluency both in Greek and English languages

We Offer

A competitive compensation package, a stable and enjoyable working environment, excellent opportunities for professional development, working on leading-edge technology and industry trends.
