

# How FortiGate customers can secure their Hybrid Workforce

Only 50% of workers say they use a VPN\*

57% of cyberattacks occurred while using a VPN\*

**1** Hybrid working is the new norm ...

**2** ... which requires a new approach to security

**3** Capitalize on your existing Security investment

VPN is not enough and not always used

Remote employees connect directly to the internet & cloud apps without any protection or visibility to IT departments

Use the power and flexibility of cloud native technologies to address Hybrid Workforce challenges and improve your Security posture

Overall Security is compromised!

## FortiGate customers, upgrade to FortiSASE and benefit from:

### Always-on Protection and Privacy

Wherever users are, whatever they access

### Greater Visibility and Control

See and control access to cloud apps

### Better User Experience

Better connectivity with seamless user protection

### Improved Security Posture and Compliance

Consistent Security with full cloud-based reporting

### Simple Deployment and Management

Simple upgrade of already deployed FortiClient agents
